

## Exchange Fields

thought becomes force, the circulatory fold of abstract physics  
energy circulates becoming our exchange fields  
the alchemical metaphor becomes code, the codes become enfolded  
motion becomes thought, the flow of behavioral signals  
light becomes information, response fields activated  
informations becomes light, paths and returns  
light becomes thought, trajectories and relays  
thought becomes action, enfolded in response  
thought becomes positional force, transference states, the body  
articulated  
energy becomes action, circulation informs the fields  
thought becomes energy, a return that inter-folds  
proximity becomes a trigger, the physics of emotion dispersion  
a body becomes entangled with an abstraction embodied  
bodies become arousal, circulating emotives  
the body becomes articulation, layered across the states  
abstractions become one, the plural articulation  
the drone lines becomes circulatory, angular musculature of the body-  
song  
thought merges with the machinic flow, grasping for a balance  
sexuality becomes a linguistics, the clock of abstract physics  
dance becomes a return that folds, the abstraction of states of  
exchange  
trajectories becomes gestural, reacting with precision  
gesture becomes light flows, hand measures, trigger fields  
motion becomes erotic, the touch field distances of abstract states  
the boundary becomes a bridge, the physics of pulse edges circulating  
a container becomes activated, and motivates the chain reaction across  
differing states  
multiple vessels becomes engaged, inter-fields of energy  
containers become saturated, held in suspension  
a motion becomes ecstatic, a hovering balance of circulating  
abstractions  
energy becomes transgressive enfolded in the circulation  
the constraints becomes costly, no sliding off of meaning  
touch becomes arousal, the tensile surface organization  
emotion becomes confused, complex dimensions of release  
vapor becomes a thought body, the woven arms inverted, inserted  
breathing becomes energy, the voice of exchange  
the body becomes a battery, the musculature of containment  
a battery becomes a litany, alternate embodiment, a transference of  
the states  
a process becomes a physicality, light flows into larger bodies, the  
summing of momentum  
a word becomes a plurality, folding across the intervals  
a plurality becomes a oneness, the plural musculatures of encoded  
articulations

a boundary becomes amorphous, this alternate perspective, the fine  
proximity  
a site becomes the body cathartic, the body of information  
mining becomes the metaphor of articulation, the exchange fields  
a gesture becomes informed, grasping at the balance of abstractions  
intermingling  
motion becomes poignant, grafting emotives, the life of emergence  
an angle or positioning becomes a path to navigate, a circulation  
trigger  
motion becomes you, emergent of flows
